

KOHL'S

Information Security Intern

Saving the world, one data threat at a time.

In a data driven world, cyber security is more important than ever. As an information security intern you will detect, prevent, and respond to information threats and security breaches through technical security programs designed to protect the integrity of Kohl's networks, systems, applications and data.

What you'll do

Get exposure to compliance, governance and information monitoring

Review and operate enterprise-wide security platforms and investigate events using security management software

Maintain and communicate information security policies and coordinate company-wide information security controls, using your knowledge to contribute to and improve Kohl's policies and processes

Conduct information security audit preparation, coordination and response

This is you

undergraduate junior

You have a passion for security - you're constantly evaluating threats in everyday life and are careful about the information you give out

You understand the demands of the security industry and love keeping up with trends in technology

Bonus points: you know the difference between a red team and a blue team
